

## Blockers

1. Infrastructure workstream:
  - Initial HPDI deployment still at risk due to shortened timeline.
  - **Blocker:** Author cloud build service account attempting to create the cloud storage bucket and failing.
    - **Mitigation:** Author to validate steps for original ask of exempting from the Organization DRS Policy were taken. MW needs validation to continue installation.
  - (Resolved) Delayed last week due to bugs regarding scaffolding. Google resolved scaffolding issues 4/15 & completed scaffolding in Author GCP 4/16. Author to create Cloud Ops workspace 4/16
  - (Resolved) Installation begun 4/16 PM after scaffolding. MW identified Author blocker. Project created inside the HPDI folder but couldn't associate with Billing. Need VM.
2. Data workstream:
  - **Past due** - decision on **Medications API** delivered by Author
    - Originally due 3/15 pushed to 4/12
    - Drop dead date 4/19 EOD

## Accomplishments

- Data mapping confirmation
  - Reviewed Sugar Data mapping with data stewards
  - Allergy & Intolerance, CareTeam & Procedures data mapping
  - Review questions from Author on Patient Demographics & Plan Coverage
  - Received approval from Data Steward for the Plan Coverage Data Mapping
- Consent API deadline date assigned for 4/29 (updated in Asana)
- Autho POC deadline date assigned for 5/14 (updated in Asana)
- Dan Ly - request for Autho access
- MW/Google alignment on Consent API ask
